A CALL TO NATIOANL EMERGENCY

Kingdoms of Artiscia is founded on humanitarianism. It values the Human Resources and cater to its citizens the best in time of need and devastation. As you are all aware, we have various social media which is used today. It will, temporarily replace all personal gatherings. This will reduce the number of infected, prolong lives and eliminate death from infections. There are social, government administrations and services to assist with financial obligations and citizen burdens.

In this document we will discuss many things KA Land Leaders. (AIUNB/KAME agreement holders and KAMESU members) mostly money and caring for our citizens. It outlines the various types of services and the values in each in some cases, as well as the event of repopulation after successfully overcoming the situation. While every detail is not covered in these pages expect to have more clarity as we move forward and do not be afraid to ask questions.

I: Citizen Assistance During National Crisis

Government assistance is necessary to ensure that all those who are underprivileged can live a quality of life that is respectable. Government is responsible for all citizens not just those who have voting rights or owning businesses. Not just those who are contributors to the exchange markets or investment community, every citizen life is important. Each one counts toward your Gross Domestic Product and when in need it is these poor citizens who are even more eager than those who are more privileged who will reach out and help if given proper opportunity. Often these people need education, employment, homes, medical and dental care and the resources are elicited to them based on their skills and ability.

Public assistance is necessary and usually provided by groups of people who have taken conscientious or moral responsibility to provide services by creating organizations which cater to the citizens. In many cases these are in form of charity foundation.

Citizens can help by volunteering and or encouraging needy citizens to take advantage of the means being provided for them. Many needy citizens do not know there are programs and services out there the help.

Kingdoms of Artiscia

Social Services Administration Headquarters

Monetarily: there are three types of monetary government assistance for individuals and families.

1. Family care insurance (FCI) which is for parents with children ^
2. Supplemental income insurance (SII)
3. Food staples income (FSI)
4. Free Housing (FHI)

Monetary cash advances are sometimes necessary to assist citizens who have lost employment or business has gone slow for small business owners. The various types are necessary to accommodate need, for example in time of mandatory quarantine.

In this case all persons who were employed should receive unemployment compensation. This is a percentage of their income in an account given by their employer for emergency purposes. Each pay period x amount of dollars goes into an insurance account for them. Upon discharge from employment, except in certain circumstances*, the amount is then disbursed to them in weekly or biweekly deposits. This number is based on the cost of living. What is the minimum amount of money per month it takes to preserve a roof over one's head, meals and utilities? These are basic needs for everyone. This amount is not standard for everyone. There are three levels of unemployment statistics. This stat is based in the visual level of everyone.

1. Poor: these are homeless or citizens who have been earning meager or minimum wages and barely getting by in their employment and will not be able to survive without any assistance. Those who will have a more difficult time finding a position with income due to their education or level of experience.
2. Medium: these are people who make more than minimum wage but less than 30,000 per year
3. Upper: these employees make between 30,000 up to 175,000

The percentage of earnings should be no less than 35% of the gross salary and distributed at least once weekly.

Another source of government funded income is supplemental income insurance.

This is in form of retirement or disability income. Retirement typically occurs when one has reached an age where physical labor is unreasonable or unsuitable for their health. In many cases this class of people do not have the privilege of having retirement accounts and other things one with a more substantial income would for their future when times get hard.

Kingdoms of Artiscia

Social Services Administration Headquarters

Every person born should have an account and a percentage of their taxes be paid into it each pay period. From the time they are born up to their first salary the government should put one hundred dollars per month into this account.+. At retirement age or upon physical disability they may draw upon this account once per month. In some cases, the disable returns to work at which time the balance is closed for savings and then replenished with new deposits from the new income.

Knowing the citizens will be incapable of managing their expenses depending on how long the quarantine, there are several options. Bear in mind these are not to be used as lifetime incomes. They are temporary supplements to help them sustain a quality of life that may be minimal but in order to keep them afloat while they transition into the next stage of decisions for their life.

1. For those who have become disabled due to lack of work unemployment compensation* is the first option.
2. For elderly citizens, a supplemental security income* will be acceptable
3. For able bodied persons unable to acquire traditional employment a government assistance program may be installed to provide them with work and images. **
4. For those who can provide income to pay their house expenses (rent/mortgage, utilities, phone, television/cable/satellite) but have trouble providing meals for their household. A steep end may be provided based on the number of members in the home depending on the provider***

Unemployment compensation is an insurance plan. employers pay into an account each paycheck and, under unexpected circumstances the employee is released from employment, they qualify for the insurance.

Insurance must be no less than 35% of their paycheck and for no more than one year. In some cases, emergency extensions may be applied for. Employee must have worked for at least ninety days.

Since not every employer pays the same amount for salary, the percentage is necessary to determine totals. At employment termination amount accrued is divided into equal weekly payments to be paid for no more than six to twelve months of payments. This is to give the discharged employee time to transition into their new occupation or determined lifestyle.

***Qualifying employment discharges:** this is the only reason why the unemployment insurance will be paid in full amounts previously mentioned. If employee terminated employment of own recognizance, only one half the employment insurance will be paid. Being released for any reason by management and employment beyond the citizens' control.

Should an able-bodied citizen be able to prove that they are gainfully seeking employment. After two months of unsuccessful attempts to acquire employment. A six-month unemployment insurance application may be submitted and weekly payments in the amounts based on the last wage earned is available.

Every employee deserves employee privileges.

1. Vacation time: vacation time is paid time off. standard vacation time is 28 days per year. And may not be taken in increments more than 14 days in one six-month period. Employee must have worked six months before qualifying for vacation time. If an emergency (family member death or parents, new parents upon birth of baby) employee may request up to thirty days.
2. Sick leave: may or may not be paid time off. The maximum amount of time given for sick leave is 168 hours or (7days) Everyone has moments in life when they need to take time and heal themselves. Sick leave or personal paid time off is granted in hourly increments. Since most employers pay hourly wages. Paid and non-paid sick leave is determined by the necessity by the occurrence++
3. Safe working environment: no job description is the same. However, all work environments must be clean and free of debris and biohazards. All necessary items and or equipment necessary to person the duties in as professional manner as possible is the standard. Each employer must have employee handbooks to help the new worker understand his or her responsibilities and expectations.
4. Nondiscriminatory opportunities: everyone is important in any society. Whether it be member, employee, or home. No one deserves to be treated with discrimination. Not for age, race, culture, gender, color of their skin, nor religious beliefs. Employment positions require persons qualified for the job. Persons who can perform the task required to successfully bring the expected outcome for completion. Any organization can hire persons who make them happy but do not complete the tasks or poses the skills to help bring the company to success. Intellect and skill are abilities we must endure we are not limiting ourselves and the citizens by permitting organizations to abuse our Human Resources and economies with these kinds of negative practices.
5. Harassment free environment: many people are unwelcome in certain social circles. In life we are always surrounded by those who lie us and do not. The workplace is a professional arena of individuals collected to bring about a certain outcome which is profitable for the owner and the employee, as well as its patrons. Harassment on the job can be described as sexual hereby a man or woman makes sexual gestures either by touching or using innuendo that is unwarranted or unwelcome.
6. Fair wage: minimum wage in KA Mughal Empire is 14 Atlan. Visit or write to LA Labor administration for more information regarding labor ages etc. this wage is determined by the cost of living analysts done by the Ka Social Services on vital statistics council.
7. Unemployment insurance: unemployment insurance is a funding account set up by employers to assure the employee is financially able to sustain a transitional quality of life between end of employment and new employment.

Kingdoms of Artiscia

Social Services Administration Headquarters

Government services. There are some circumstances where citizens are not employed, or their wage-earning ability is limited due to uncontrollable circumstances. The government is prepared to provide these services to them.

Why: it is the government's responsibility to the citizens. Citizens depend on leadership. Leaders are responsible for their health and welfare. If the public or society is not sufficient for them to take care of themselves it is the responsibility of the given the to make a way for them to be productive and happy citizens. If citizens can be independent and provide for themselves there is no need for government intervention on the level of society which determines their productivity and quality of life experience.

Government services: many times, the government needs for human services are beneficial for the population of citizens which either have low skills or education levels required to acquire occupation in fields they desire. These government employment opportunities may not pay as well as the commercial sect, but they do provide opportunities as well as they do. For citizens with few skills but are able bodied and able to work. The government will provide education as well as employment opportunities.

1. Health: many do not believe that it is necessary for health insurance for citizens if they do not work or cannot afford it. Medical assistance which includes all aspects of care for the body to be recovered or sustained throughout life. Dental is also a form of health care citizens should be covered for. Routine cleaning, cavity prevention. General oral and physical health care coverage provided by the government.
2. Quality of life: every citizen deserves quality of life. Home life is the very structure that every family uses as a foundation for their social standards. It provides emotional health and balancing.
3. Prosperity:

Public service admins: these administrations assist the citizens with finding the resources that meet their needs. Every citizen has basic needs. Health, quality of life and prosperity.

Note: these circumstances are accommodation for dire circumstances.

If unemployment compensation maxed is only approximately 1300 per mon5h, which is good for some people who only make 5hat much on 5eir salary and fair to give to them because it's insurance to help them survive in hard times. If any additional assistance is necessary food vouchers will be distributed to ensure families with children are fed.

In case of state of emergency or economic situation where the government has decided to take command of the economic system and manage for citizens health and or safety and welfare, these are options Kingdoms of Artiscia Mughal Empire will take and offer the citizens. For example, a pandemic or some other mass forced unemployment which affects the entire population.

Kingdoms of Artiscia

Social Services Administration Headquarters

If in case the government must close all businesses and quarantine the citizens to their homes these are the options considered for their inconvenience and cooperation with the administration.

All citizens applying or on unemployment receive this. If a citizen chooses to terminate his or her employment on his or her own recognizance this is non qualifying unemployment for the unemployment insurance.

1. 0-2000 per month income households receive all their income in unemployment for 6 months to one year, or for the duration of quarantine or forced unemployment.
2. Monthly incomes of 2000- 6000 receive 2000 per month unemployment plus an additional 600 supplement
3. Monthly incomes of 6000-75,000 receive 3000 and the additional 600 supplements
4. For incomes 75,000 up to 170,000 or households whose mortgage and or rent is less than 2500 month, we can suspend all monthly payments for six months to one year depending on quarantine time Constraints.
5. Above that income ratio we can send a supplemental check for 2500 per month, because they have investments and money market accounts etc.

For businesses:

1. Small to medium: many of them will benefit from the above-mentioned privileges. We can give them a break on their business loan repayment for up to one year, by suspending and or reducing the payments by a year
2. Large businesses are not suffering. they have taken Trump's tax cuts and saved billions of dollars for themselves.

Bear in mind. this is only for mandatory quarantine which is what I'm suggesting. That is why the case numbers are so high and the death tolls are rising. it is also why they are claiming a mysterious illness in children.

II. Recovering from Corona virus

First, we must begin by making sure we have the cooperation of the citizens. They must be in position to respect our decisions completely. Once we have this trust from them, we can begin to consider the future of our populations.

Once we have the citizens' trust, we can begin to look at the condition of our current situation and assess the possible outcome. Once we have all statistical analysis and are confident in the expected outcome's potential. We can begin to plan accordingly.

What is the ratio of occurrences?

Confirmed instances

Resolved

Terminated lives

Reconfirmed instances

How does it affect our entire population? What is the demographic of instances? What societies are affected? Was it something alien, is it something we can conquer swiftly? What exactly will it take to rid our citizens of the threat against them?

Then we must plan. Taking the information, we have collected we can begin to accumulate options for solution.

Treatments,

Environmental safety

Resources for life sustaining

For the corona virus we need mandatory quarantine. As such it is inconvenient for all. However, the lifesaving procedure is required for the safety all along these who will survive through the duration of our war with it. Survival rates depend on the citizens' decisions to cooperate and follow the rules. While they decide their fate we still expect and demand they comply with the rules.

Repopulation after a virus like this is an extremely sensitive thing. We must make sure we have certain things in order before releasing our citizens into the danger zone on their own recognizance.

Until we have that circumstance, we must prepare our citizens for the duration. This means we are responsible for their health, financial inconvenience as well as their social life. Once that is confirmed and all details of the matter are satisfied, the citizens are free to begin to reenter public environments.

This is easier said than done. Therefore, the means are written in this document for those who require instruction.

Kingdoms of Artiscia

Social Services Administration
Headquarters

The first things we must do is stabilize the economy. Before we do, we must decontaminate it. Hazardous materials teams and biohazard teams must go out and sweep clean the streets and public areas belonging to the government. Public transportation including taxi and railways must be completely sprayed.

No international visitors will be permitted within the land until after the virus is completely removed from our empire. Those returning home will be required to report to a testing site and treated, as necessary. ^^ state hoarders will be manned by bio teams with testing equipment and vaccine.

All other citizens are required to remain indoors. If they need a bit of air, they may step outside their residents temporarily and return indoors immediately after fifteen minutes unless on permit to run an errand which is only permitting one hour of travel to and from. This means the calculated time for all errands is one hour. If they can't manage the errand in that amount of time they must reschedule or divide the experience into later dates.

Each family with surnames that begin with the following letters are to be given time to go out and run their errands and or get some fresh air during these hours specifically. Anyone caught out during restriction or after their curfew will be fined. There will be random stops and border patrol officers to test for viruses as they come and go. Special officers will be tasked. To make sure all person traveling are on pass.

1. A-B 9 - 10am
2. C-D 10 -11 am

Headquarters

III. Operation Public Clean Up

Our national guards and temperatures service members of the armed forces will be used to assist with our decontamination. public spray is to be used by biohazard teams and must be composed of natural substances not harmful to plants nor living organisms. Nothing causing damage to the natural structure not the human population as well as wildlife should be used.

While this takes place between the hours of 5-8 am, and again from 11pm to 3 am for two weeks, all citizens are mandatory quarantined. The only persons traveling are medical professionals and delivery persons. They will be provided a pass of identification to travel during restricted hours. Delivery persons, or postal workers and or other product company delivery service members are the only ones who will be permitted to move about freely based on their employment requirements. Grocery stores may remain open with restriction on food handling and preparation. Managers may permit deliveries and or pickup. Restaurants or fast food places wanting to participate in the humanitarian efforts may also deliver foods. At no extra cost to the citizens. This is not a time to concern ourselves with money. This is a matter of life and death and many people will be hungry and needing assistance once we take away their freedom to roam and manage their own lives.

After the first two-week public decontamination evaluation will be done by test sample.

IV. Repopulating the public

Upon all clear from the office of vital statistics that all cases are recovered, there are no deaths nor new cases occurring. In conjunction that if any new cases are recorded, they are very minimal and easily cured. We can begin to repopulate our lands. First, we must begin to reestablish our economic system. But this we must do in order of priority 5at which is necessary to provide organized reintegration and civilization.

First, we can begin by reestablishing our social services and other government assistant offices. Legal services, dental offices, all departments necessary for social services for the citizens. All these administrations will have been decontaminated by the authorities and will be kept this way though out the duration until we are all clear. The standards for such is something we should not have to bring to anyone attention however it is the case. Although we are reopening these businesses, we are implementing a new regulatory system to assist with health and welfare of the employees and standard expectations for such.

Kingdoms of Artiscia

Social Services Administration Headquarters

1. Do we have the virus under control? This can only be answered by the number of lives we have saved. Have we managed to prevent death? Are the infected able to come into any clinic, medical facility and or be visited by a medical team and be vaccinated and or treated and trust that he or she is cured? Have our success rates for treatments vs cured been proven successful enough to convince ourselves that the society is safe? If the answer is no, we have to continue with the quarantine and seeking answers to provide solutions to the problems.
2. What is the problem? What have we not done to come to the desired conclusion? Where are we in progress? How along is it going to take? Why? We need three options per problem for solution.
3. What are the treatments? What are the side effects? What is the short term and long-term side effect? What are the chemicals made of? These are questions which will affect the citizens and economy in the long term. If we are cognizant now, we will be better prepared for it later.

Once, and only once we have enough data to prove that our decisions and remedies work, have begun to administer and reduce the number of cases and deaths to zero can we return the population to moral.

Each administrative activation cycle must take at least one week to become fully prepared for operations. After which citizens may begin to patronize.

First public administration Organization. These are resource admins to help organize the new order of their lives the citizens will utilize in order to transition into our new government and administrative leadership. To prevent a rush of disorderly and hectic requests for service this is the reintroduction of the social services and or countries economic systems.

This slow reintegration is effective because when used it will help teach the citizens how to better appreciate the things that are provided for them. To understand the privileges are not easy to provide but are our privilege to provide for them. Before we begin records of the company, in case of new cases and deaths. We should have recoveries being the standard result. Not average, absolute. The vaccine and over the counter tests should be made available with nonprescription remedies. Basically, this thing should be reduced to nothing more than a common cold or flu. When we reach the malls, we should have had results and calculations that the virus and quarantine are complete. Virus being completely conquered and defeated, and quarantine unnecessary.

Kingdoms of Artiscia

Social Services Administration
Headquarters

These are the primary administrations and order of reopening and population

1. Public Administrations
2. Bakeries and coffee shops
3. Printing and or office supply stores
4. Department stores
5. Furniture stores
6. Education administration buildings (classrooms)
7. Bank lobbies
8. Malls

We will test integrate. In the same order we have permitted recess from quarantine. The citizens will begin by first letter of their last names. Each one two weeks before release of the next group in order to control social balance. Once we have all citizens within the balance and introduced through the new social order, we can begin implementing new orders and reanalyze the social order and population for future occurrences and or necessary standards to maintain preparedness for unexpected outcomes. Testing will be twice per year for one month to ensure all citizens are being trained and able to perform the necessary tasks to remain alive and productive citizens in our societies and lands.

Week number. First letter of Surname. (Last Name).

Foot Notes:

**if income is not enough to put basic needs in place and enough for the citizen a supplemental income may be applied for. This amount (ii) may or May not repaid upon successful employment(iii). Government assistance is provided by utilizing the government's ability to provide a service to the citizens thereby creating jobs which require minimal skills and instilling work ethics and pride for otherwise illogically disable people and a drag on the economy and society.

***the amount of food stipend is based on the fundamental amount of cost per meal. Since most meals can be prepared from a can or box. Or ready to eat these meals. In most cases a provider is given 200 per month.

+the option of what percentage taken from their checks should be their decision. (3,5. Or 10%) this amount will then be totaled at time of discharge and paid in monthly installments until exhausted or the citizens returns to work.

++ occurrence routine appointments are over two-hour time slots; emergency sick leave may be given up to twenty-four hours. If employee does not need the entire time slot time may be recalculated and added back to the original hours. Example taking twenty-four hours but only needing twelve. Twelve unused hours are put back into allowable sick leave.

^ this form of income comes with health insurance which covers all medical and dental services (no cosmetic surgeries unless they are life threatening necessities), for our lands still evolving we will provide seeds and farming equipment. We will train the citizens interested in agriculture to grow food and build manufacturing companies to help preserve, store and distribute the food.

^^ if a citizen returning home is found tested positive for coronavirus, they will be immediately remanded to a quarantine site and prepared for treatment. Family members will be notified immediately and kept abreast of the recovery process.
